

Garage opening check sheet

Record the opening and the full movement envelope for the selected door. Measure both sides and attach photographs; design images do not establish required clearances.

Project / opening reference: _____

Prepared by: _____ Date: _____ Units: mm / in

01 / RECORD THE OPENING

Clear opening width (W): top / middle / bottom

Clear opening height (H): left / middle / right

Headroom: underside of lowest obstruction

Sideroom: left / right, viewed from inside

Backroom: available depth behind opening

02 / SYSTEM AND SITE CONTEXT

Door category / actual opening mechanism

Panel / glass design; obstructions and supports

Coil / hood space (roll-up proposal)

Outward sweep / open-leaf storage (tilt-up or hinged)

Manual / motorized; voltage and frequency

Safety brief; track / guide and operator scope

03 / BEFORE REQUESTING A QUOTATION

- ☐ **Mark the drawing.** Show finished floor level, inside/outside faces and measurement units.
- ☐ **Attach a photo set.** Include the opening, both returns, head, ceiling and access route.
- ☐ **Assign installation responsibility.** Confirm who checks structure, unloading, fitting, commissioning and safety devices.

Do not adjust springs, cables or counterbalance systems using this sheet. These tasks require the product instructions and a qualified professional.

Planning aid only. Blank fields are not approved dimensions or an installation instruction. Confirm the exact product, drawing revision and responsibilities with the supplier and qualified installer.
